## Continuation Sheet (PTOL-303) 10/003,490

Application No.

Continuation of 2. NOTE: Amended claims attempt to distinguish method features of the present invention over the art of record (Klautsz - U.S. Patent 4,633,494 and Smith U.S. Patent 6,282,264). In particular, amended claims now recite: a) a method wherein an analyzing step is performed automatically by a computer algorithm and b) wherein the processing step includes automatically processing a low-dose pre-shot image to provide imaging parameters. This proposed amendments require further search and consideration to determine novelty over the aforementioned art of record.
